About

Full Stack Developer with 3.5+ years of experience building scalable web applications using Angular, React, TypeScript, Spring Boot, and Django. Strong expertise in developing reusable UI components, integrating REST APIs, optimizing application performance, and building enterprise-grade solutions. Experienced in designing scalable frontend architectures, backend API development, and AI-assisted development workflows with a strong focus on clean, maintainable code.

Experience

NSF

Software Developer

Oct 2024 – June 2026

Gurugram

- Developed enterprise web applications using Angular, React, Spring Boot, and Django, delivering scalable solutions for food safety and compliance platforms.
- Designed reusable UI components, integrated REST APIs, and collaborated with backend teams to build maintainable full-stack applications.
- Optimized application performance through lazy loading, code splitting, efficient state management, and database/API optimizations.
- Worked in Agile teams, participating in sprint planning, code reviews, production deployments, and AI-assisted development using GitHub Copilot.

Logicladder Technologies

Software Engineer L1

Jun 2023 – Jul 2024

Gurugram

- Built scalable enterprise applications using Angular, React, Spring Boot, Django, TypeScript, and RxJS for sustainability management solutions.
- Developed reusable frontend modules, integrated REST APIs, and implemented NgRx for predictable and maintainable application state management.
- Improved application responsiveness by optimizing rendering, API communication, and frontend performance across multiple modules.
- Collaborated with cross-functional Agile teams, contributing to feature development, code reviews, testing, and production releases.

Rohde & Schwarz

Application Developer

Aug 2022 – Apr 2023

New Delhi

- Resolved critical UI and backend issues, improving system stability and user experience
- Enhanced backend services and implemented API-level optimizations for better performance
- Worked on database query optimization improving response times and system efficiency

Projects

- **Full Stack SaaS Platform:** Built scalable application using React (frontend) and Python FastAPI backend with REST APIs, authentication, and modular architecture
- **Enterprise Compliance System:** Developed scalable SPA with reusable UI components, optimized performance, and seamless API integration
- **Reusable Component Library:** Designed cross-project React and Angular reusable UI components improving development speed and consistency
- **Dashboard Analytics Platform:** Built interactive dashboards using React and charting libraries with real-time data integration
- **System Validator Tool:** Developed validation tool using Python and .NET improving automation of system checks
- **AI Integration Module:** Integrated LangChain workflows and Generative AI features to automate processes and enhance user experience

Technical Skills

Frontend: Angular (2+), Angular Components, Design Patterns, React, TypeScript, JavaScript, RxJS, HTML5, CSS3, Bootstrap
UI/UX: Responsive Design, UI Modernization, WCAG Accessibility Basics
State Management: NgRx, Redux
Backend: Spring Boot, Node.js (Basic), REST APIs , Django
Database: MySQL, Oracle, MongoDB
Cloud: Azure, AWS (Basics), API Integration
AI: Generative AI, LangChain, AI Integration in Codebase, Prompt Engineering
Testing: Jasmine, Karma, Unit Testing, Debugging
Concepts: Microfrontend, SPA, Performance Optimization, Scalable Architecture, Secure Coding
Tools: Git, Webpack, Docker, Jira, Copilot

Education

G.L. Bajaj Institute of Technology <i>B.Tech (ECE)</i>	2019 – 2023 7.5 GPA
Kendriya Vidyalaya <i>Intermediate</i>	2017 – 2019 73%
